Physical Address:

Capacity Change

Existing capacity: Amps per phase ____A ___ phase Connection capacity ____kVA

New capacity: Amps per phase ____A ___ phase Connection capacity ____kVA

Please refer to Aurora's Network Connections Standard for a list of available connection capacities.

Additional information (if required):

Note:

1. Aurora's Network Connection standard is available from www.auroraenergy.co.nz.
2. The customer may be required to make a capital contribution toward the cost of developing the distribution network, in order to make a larger connection available. Aurora's capital connection policy is available from www.auroraenergy.co.nz/disclosures/capital-contributions/
3. Connection capacities should be carefully considered. Where network development has occurred in order to provide an over-stated connection capacity, and a capacity downgrade is subsequently requested, there may be additional capital contributions payable before the capacity downgrade will be authorised.

Office Use Only

Database check: ☐ Consent No.

Customer quote: ☐ CFR Archive No.

Capacity change approved?: ☐ Yes ☐ No	By (name):	Date: 20
